SUMMARY

Full Stack Developer with around 1.5 years of experience building and maintaining production web applications using the **MERN stack (React.js, Node.js, Express.js, MongoDB)**, **Next.js** and **TypeScript**. Experienced in SaaS product development, REST API design and integration, JWT authentication, and responsive UI development. Hands-on experience with **production deployment workflows** , **AWS S3** configuration for media storage, and **Generative AI integration** (Google Gemini API) into production features. Comfortable working directly with clients across multiple simultaneous projects.

KEY SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Multi-Tenant Architecture,RBAC, Strapi

Databases: MongoDB, MySQL

Cloud & deployment : AWS S3, PM2, Filezilla ,Vercel, Render

AI Integration: Google Gemini API, Generative AI Integration,RAG,LLM

Tools & Platforms: Git, GitHub, Postman, Cloudinary, FileZilla

EXPERIENCE

Full Stack Developer | Geek Informatics *April 2026 – Present*

- Built a production **AI chatbot** (**RAG, Gemini LLM**) for Rockwins: admins upload company data, and users get streamed, source-cited answers via MongoDB Atlas Vector Search.
- Delivered **EUDR Compliance Hub** end-to-end — a regulatory compliance platform for the EU Deforestation Regulation, built with **Next.js** and Strapi CMS, serving international business clients.
- Implemented JWT-based **multi-tenant security enforcemen**t in EasyPorts, isolating each business's data and preventing cross-tenant access .
- Handled production deployments to DigitalOcean using PM2 and FileZilla, and configured AWS S3 for storing and serving user-uploaded images across client applications.
- Maintained **Ravel**, a 5-year-old production codebase — implemented new features while preserving backward compatibility.
- Contributed to **4 client projects** simultaneously, handling feature development, bug fixes and REST API integration.

Full Stack Developer | Softtrix Tech Solutions Pvt. Ltd. *March 2025 – March 2026*

- Worked with the in-house development team on **Ranktunez**, a SaaS-based web application built with the **MERN stack** and Next.js.
- Developed reusable **React.js** components and implemented UI designs in collaboration with the UI/UX team.
- Integrated frontend features with backend **REST APIs** built using Node.js and Express.js to support core application functionality.
- Collaborated with team members to debug issues, review code, and improve application performance.
- **Tech Used:** Next.js, TypeScript, Node.js, Express.js, MongoDB

PROJECTS

CureConnect – Medicine Donation & Sharing Platform

- Built a **full-stack MERN application** enabling users to donate unused medicines or find them, with role-based access and separate dashboards for donors, receivers, and admins.
- Implemented **secure JWT authentication** and real-time form validations.
- Integrated **Gemini API** for AI-assisted functionality and **Cloudinary** for image uploads, streamlining user onboarding and reducing manual effort.

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT Authentication, Gemini API, Cloudinary, Postman

NextHope – A Social Impact Platform

- Built a multi-role web application designed to connect underserved communities to employment opportunities through community-driven support.
- Integrated real-world workflows such as user onboarding, job listings, and role-based access.

Technologies: HTML, CSS, JavaScript, jQuery, Bootstrap, Node.js, MySQL, AJAX, Angular.js
